

# Amin Abd El-Shafy

Front-end web developer

✉ aminmohamedmano@gmail.com ☎ 01008597627 📍 Egypt, Cairo 🌐 [Github](#) [LinkedIn](#)

## Profile

Junior Frontend Developer with strong knowledge of HTML, CSS, JavaScript(ES6+), and React . Skilled in building responsive interfaces, handling APIs, and working with modern frontend tools. Passionate about delivering clean UI/UX and improving performance.

## Education

Faculty of Computer and Information Sciences, Ain Shams University, 2020 – 2024  
Bachelor's Degree in Computer Science GPA (Very Good)

## Courses

Master Modern React (Advanced) – React.js, Next.js, Context API, React Query, Redux, Tailwind CSS, advanced patterns

Advanced CSS & SASS – Flexbox, Grid, animations, scalable styling

Responsive Web Development – HTML5, CSS3, mobile-first design

## Technical Skills

Frontend Core: JavaScript (ES6+) | TypeScript | React.js | React Hooks | StateManagement | React Router | React Query | Context API

Styling & UI: Tailwind CSS | CSS3 | SASS | Bootstrap | Responsive Design | HTML5

Web & APIs: RESTful APIs | HTTP / HTTPS

Tooling & Workflow: NPM | Debugging Tools | Deployment Basics | Git

Other Knowledge: Basic SQL | Software Testing Fundamentals

## Projects

### Fast Pizza Restaurant app [🔗](#)

A modern single-page pizza ordering application built with React, Vite, and Redux Toolkit. It features a complete cart system, user registration, order creation flow, dynamic routing with React Router, and a fully responsive UI built with Tailwind CSS, focusing on performance and clean architecture.

### Store E-Commerce Application [🔗](#)

A fully functional and responsive e-commerce web application built with React, Redux Toolkit, and Tailwind CSS. It includes product listing with sorting and pagination, product details, product creation, shopping cart functionality, and user authentication with protected routes and persistent state management.

### WorldWise – Interactive Map Application [🔗](#)

interactive map interface. The project integrates Leaflet for dynamic map rendering, implements client-side routing with React Router, supports adding cities with date selection functionality, and uses JSON Server as a mock REST API for data persistence. The application follows a clean component-based architecture and modern frontend development best practices.

### Forkify — Recipe Search App (JavaScript, MVC, API, Parcel) [🔗](#)

A modern JavaScript app to search, view, and bookmark recipes from the Forkify API. Features include dynamic servings, detailed cooking instructions, pagination, state management, and LocalStorage for favorites. Built with ES6 modules, MVC architecture, and bundled using Parcel for smooth UI updates.

## Languages

Arabic – Native

English — Good (professional)
